LAWN GRASS FERTILIZERS & PLANT FOODS

VEGETABLE FERTILIZERS

Natural manures are the best fertilizers for vegetable gardens, also for conditioning clay and poor soils.

ARCHER-BRAND PULVERIZED SHEEP MANURE

Frequent feeding of "Archer Brand" produces crisp, tender vegetables. Plants lacking food stop growing and become tough and tasteless. Whenever your crop shows signs of lagging, cultivate with an application of 1000 to 1200 lbs. of "Archer Brand" per acre. It builds up the soil, and speeds up production making possible the production of at least two crops from the same soil each year.

SHEEP MANURE

Archer Brand pulverized sheep manure which is treated to kill weed seeds which are so often found in natural manures. Put up in paper lined bags. Gives immediate results, easy to apply and is a well balanced lawn fertilizer. Analysis: 2% Nitrogen; 1% Phosphoric Acid; 2% Potash: 5-lb. pkg., 35c; 50-lb. bag, \$1.40; 100-lb. bag, \$2.75.

BONE MEAL (Steamed)

Fine ground Bone Meal. Has been used for years and is still popular. 5 lbs., 60c; 10 lbs., \$1.00; 25 lbs., \$2.00; 50 lbs., \$3.50; 100 lbs., \$6.50.

SUP-RO

The Triple Purpose Plant Food. Natural Mulch—Soil Conditioner. Analysis: 4% Nitrogen, 4% Phosphoric Acid, 4% Potash. 1½ lb. box, 25c; 8 lb. box, 85c; 25 lb. bag, \$1.95; 50 lb. bag, \$3.35.

WEED-KILLERS

Amazingly new powerful weed killers make it possible to have a beautiful weed free lawn. Will rid your lawn of ugly weeds and at the same time will not harm Blue Grass.

Most weed killers is a new water soluble Herbicide containing 2-4D (2-4 Dichlorophenoxyacetic). When diluted as recommended is effective for controlling most types of broad-leaved weeds and is not injurious to most grasses.

WEEDONE

Contains DCP

(2,4 dichlorophenoxyacetic acid)

WEEDONE is a selective weed killer; that is, it kills some weeds and damages others, while still others are not affected by it. WEEDONE is recommended for killing poison ivy, poison oak, bindweed or wild morning glory, Japanese honeysuckle, sassafras, black locust, and wild or choke cherry. It will also kill many other weeds under favorable conditions.

In late spring and early summer before the plant has matured or hardened, 90% to 95% kill has been obtained with one spray application of WEEDONE to cocklebur, blackberry, Canada thistle, yarrow, dandelion, plantain, sumach, oxalis, chickweed, horse nettle, sheep sorrel, ragweed, white clover, French weed, and sweet clover, poison oak, bindweed, honeysuckle. Mix 2 oz. with each gallon of water and spray when leaves are green on a warm day. Also kills other weeds on the lawn. Follow directions on each bottle.

PACKAGING AND SIZES

6 fl. oz. bottle (for 1000 sq. ft.)	\$.75
1 qt. bottle (for 5000 sq. ft.)	2.50
1 gal. can (for 20,000 sq. ft.)	7.50
5 gal. can (100,000 sq. ft.)	25.00
Wee-Dust (2,4D), 12 oz. shaker top can	.75

HYDRATED LIME

Will correct, and prevent sour soil if used as a top dressing on lawns in fall or early in spring. 10 lb. pkg., 50c; 50 lb. bag, \$1.25; 5 50-lb. bags, \$6.00.

PEAT MOSS

Horticultural Grade

Peat moss is not a fertilizer, but, when used on the lawn as a top dressing, prevents soil from baking and crusting in hot weather.

Canadian—Lb., 15c; 2-bushel box, \$1.79; ½ bale, \$3.00; per bale, \$5.00.

ADCO FOR MAKING ARTIFICIAL MANURE

Mix ADCO with leaves, weeds, vines, clippings, cuttings, straw, cornstalks, etc., and turn them into rich plant food. It's easy—anybody can do it—and every pound of ADCO makes 40 pounds of splendid fertilizer. 5 lb. carton, \$1.25; 20 lb. bag, \$2.75; 100 lbs., \$9.00.

MISCELLANEOUS PLANT FOODS

NITRATE OF SODA—16% Nitrogen. Lb., 15c; 10 lbs., \$1.25; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.50.

SULPHATE OF AMMONIA—20% Nitrogen. Lb., 15c; 10 lbs., \$1.25; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.50.

MURIATE OF POTASH—50% Potash. Lb., 15c; 10 lbs., \$1.25; 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.50.

SUPER PHOSPHATE—20% Phosphoric Acid. Lb. 15c; 10 lbs., 85c; 25 lbs., \$1.35; 80-lb. bag, \$2.40; 5-bag lots, \$3.00 per bag.

MILORGANITE

Lawn Fertilizer. 6 per cent Nitrogen, 2 per cent Phosphoric Acid. Per 100 lbs., \$3.95; 600 lbs. or over, \$3.80 per 100 lbs.; 25-lb. bag, \$1.40; 50-lb. bag, \$2.30; 1,000 to 1,900 lbs., \$3.60; 2,000 lbs., \$63.50.

WEED-NO-MORE

It's based on an entirely new principle and contains an ester of 2,4-Dichlorophenoxyacetic acid. KILLS ALL THESE WEEDS: Dandelion, Plantain, Ragweed, Bindweed, Wild Lettuce, Milkweed, Poison Ivy, Poison Oak, Thistle, Wild Mustard, Doorstep grass, Chickweed, Various Clovers. How to dilute: 1½ teaspoons of WEED-NO-MORE to 1 quart of water or 2 tablespoons (1 fluid ounce) of Weed-No-More to one gallon of water. 8 oz. cans, \$1.00; 1 qt. bottle, \$2.98; gal. can, \$11.00.

AMMATE WEED KILLER

A new DuPont Chemical, Ammonium Sulfamate, kills most all weeds and grass and is especially effective on such as Poison Ivy, Poison Oak, Poison Sumac. Use ¾ lb. to 1 lb. per gal. of water and apply with a sprayer or use dry mixed with sand and apply by hand. 2 lb. jar, 85c; 6 lb. jar, \$2.25; 10 lb. pkg., \$3.75.

ACME WEED KILLER

KILLS ALL VEGETATION

For use on cinder driveways, paths, ditches, clay courts, fence rows, and waste places where all vegetation is to be eliminated, the weed killer should be diluted 1 to 50 with water and sprayed thoroughly over the sections desired. The 50 gallons of diluted spray are sufficient to spray about 50 square yards.

Acme Weed Killer can be used along walks, curbing and pathways without staining or discoloring concrete, stone, or brick. Use 8 tablespoons full to one gallon of water. 1 pt. can, 50c; 1 qt. can, 80c; 1 gal. can, \$2.10; 5 gal. can, \$8.00.

HYPONEX Contains Vitamin B1

When you water your plants—FEED THEM.

Give them Hyponex-and-water, a complete plant food that grows all kinds of vegetation in sand, soil or cinders. You will have stronger, bigger plants; more and larger flowers. Hyponex is a dry, odorless powder. One teaspoonful makes a gallon of plant food. Highly concentrated. Clean, safe, odorless. Easy to handle, will not burn foliage. Contains Vitamin B1

3 oz. can. (Makes 18 gal.)	.25
7 oz. can. (Makes 42 gal.)	.50
1 lb. can. (Makes 100 gal.)	1.00
10 lb. can. (Makes 1,000 gal.)	8.00
25 lb. can. (Makes 2,500 gal.)	15.00

VIGORO

A complete plant food for grass, flowers, trees, vegetables and house plants. Contains all the elements Analysis: 4% nitrogen, 12% Phosphoric Acid, 4% Potash. Also contains the following essentials to plant growth: CALCIUM, SULPHUR, BORON, IRON, COPPER, MANGANESE, MAGNESIUM and ZINC.

Vigoro produces really thrilling results on all growing things . . . economically! That's why it is America's largest selling lawn and garden plant food.

Vigoro supplies, in properly balanced proportions, all 11 food elements plants need from the soil. It always works . . . because it does what ordinary, incomplete fertilizers just can't do. Vigoro is the soundest protection of your investment in your lawn and garden.

Vigoro is safe, sanitary, odorless, and easy to apply. And a little of it goes so far! A single 100 pound bag of Vigoro will completely feed an area of 2,500 square feet. 1 lb. pkg., 15c; 5 lb. pkg., 50c; 10 lb. pkg., 90c; 25 lb. pkg., \$1.60; 100 lb. bag, \$4.25; 500 lbs., \$20.00.

TRIOPEN ROSE FOOD

5% Nitrogen, 10% Phosphoric Acid, 5% Potash. A 5-10-5 Rose Food made from organic (long lasting) and inorganic (quickly available) materials. 5 units of Nitrogen to give healthy green foliage; 10 units of phosphorus for healthy, sturdy plants and roots; 5 units of potash for bigger and better flowers. 5 lb. bag, \$1.00; 10 lb. bag, \$1.60; 25 lb. bag, \$3.00.

ZOTOX—Crab Grass Killer

Kills crab grass without destroying blue or other lawn grass. Destroys the plant, kills the seed and checks reinfestation. Also kills other weeds, such as Dandelion, Plantain, Buckhorn, Chickweed, Spurge, Heal-all, Knotweed, Ground Ivy, and Sorrell. Simply mix with water and spray.

8 oz. size (Makes 5 gals.—Treats 1,000 sq. ft.)	\$1.00
16 oz. size (Makes 10 gals.—Treats 2,000 sq. ft.)	1.50
32 oz. size (Makes 20 gals.—Treats 4,000 sq. ft.)	2.50
5 lb. size (Makes 50 gals.—Treats 10,000 sq. ft.)	4.50

GRASS & FERTILIZER SPREADERS

RUBBER TIRED WHEELS

Model B—Just the right size for the small home owner. Spreading width 14 inches, hopper capacity 15 pounds. So light weight and convenient for the lady gardener. Each, \$7.85.

Junior—A large hopper, 16 inches spreading width and 35-pound capacity. Convenient size for the average home. Sturdy, lasts a lifetime. A very popular model. Each, \$12.00.

Standard—The spreading width of this model is 24 inches and the hopper capacity is 65 pounds. The man with fair sized property will welcome it. A favorite on school, hospital, factory grounds, etc. A great time saver. Each, \$28.00.

GARDEN, FLOWER AND GRASS SEEDS

HARN DEN'S SEED CO.

A Beautiful Flower Garden for You

ANTIRRHINUM—Snapdragon

SNAPDRAGON—MAXIMUM—GIANTS

MAXIMUM SUPER GIANTS (Rust Resistant). In habit these are taller, grow to a height of 2 3/4 ft., and the flowers are much larger. Best outside bedding kinds, in many colors and kinds, white, rose, pink, yellow, copper, crimson, pure pink, scarlet, also mixed all colors. Pkt., 20c; 3 pkts., 50c; 1/2 oz., 75c.

TETRA SUPERFINE MIXTURE—Every color seen in this glorious flower, plus some new ones. There are shades and variations of bright orange, light orange, peach-orange, rose-orange, bronzy yellow, golden yellow, canary yellow, yellow-flecked red, antique bronze, red-bronze, orchid, scarlet-tipped yellow, scarlet, crimson, pinks from apple-blossom to deep rose, pink-flushed yellow, pink and white combination, pure white and others of harmonious tone blendings; a most unusual mixture. Pkt., 25c, 2 pkts., 45c, 1/16 oz., \$1.50.

ALYSSUM

COMPACTUM (Violet Queen)—Distinct variety with bright violet flowers. 1/2 oz., 35c; 1/4 oz., 60c; pkt., 15c; 1 oz., \$2.00.

LITTLE GEM.—5 in. dense flower heads but not spreading. Oz., \$1.40; 1/4 oz., 40c; pkt., 10c.

CARPET OF SNOW. (Procumbens Snowcloth). Well named. Very dense flat masses of white flowers, 3 to 4 in. high by 8 in. wide. Exceptionally even strain. Pkt., 10c; 1/4 oz., 40c.

MARITIMUM.—Sweet white, honey scented, 1 ft. Oz., 60c; 1/2 oz., 35c; Pkt., 10c.

COSMOS

SENSATION—The flowers are mammoth in size, 4 to 5 inches in diameter, with broad, heavy fluted petals carried on very long, strong stems. It is extremely early flowering, blooming in 10 weeks from the time of seeding. Pink, White or mixed. 1/2 oz., 50c; pkt., 25c; 3 for 65c.

DAZZLER—(New), dazzling crimson. 1/2 oz., 50c; pkt., 25c; 3 for 65c.

COSMOS SENSATION RADIANCE—Top award winner for 1948. A striking new color combination never before seen in Sensation Cosmos. Deep rose petals overlaid with large well-defined zone of rich crimson. Pkt., 25c.

EARLY DOUBLE CRESTED—A wide variance of lovely crested or anemone-shaped flowers, 2 to 2 1/2 in. across, of different shapes can be expected in this type, the balance being single flowers of good quality. Free blooming plants, 3 to 4 ft. tall. Mixed colors. Pkt., 25c; 1/2 oz., 50c; 1/4 oz., 85c.

AGERATUM

Midget Blue. Three-inch globular plants are smothered with Ageratum blue flowers. Most uniform in habit, truest in color yet produced. Pkt., 25c.

ASTERS

CALIFORNIA GIANT—2 to 3 feet. Their unusual beauty and size, as well as their long, sturdy stems of the non-lateral type, make them very attractive for floral decoration and particularly adapted for cut flowers. Rose, Light Blue, Purple, White, Carmine, Shell Pink, in separate colors, or all colors mixed. Pkt., 15c; 3 for 40c.

GIANT BRANCHING—2 1/2 to 3 feet. All wilt resistant. Branching habit, vigorous plants, large double flowers, stems long, vivid colors. White, Rose Pink, Deep Scarlet, Crimson, Lavender, Purple, or all colors mixed. 1/2 oz., 35c; pkt., 15c; 3 for 40c.

AMERICAN BEAUTY—2 to 3 feet. All wilt resistant. Early flowering type. Plants about 2 to 3 feet high, of branching habit, commencing to bloom in early September and lasting until destroyed by frost. Flowers large, borne on long and stout stems, from 18 to 24 inches. White, Pink, Carmine, Rose, Purple, Crimson or all colors mixed. 1/2 oz., 35c; pkt., 15c; 3 for 40c.

IMPROVED CREGO

OR TALL OSTRICH FEATHER, WILT RESISTANT
Plants robust, branching about 2 1/2 ft. tall, flowers large, double and well formed, one of the finest varieties for all purposes, blooms in mid-September.

Blue Flame.—A rich fairly deep blue.

Crimson.

Deep Rose—Rich deep rose. Do not confuse this with Rose-Pink.

Purple—Dark blue.

Shell Pink—Very fine bright shade.

White—Large, full and clear color.

Crego Types Mixed.

Any of the above, Pkt., 15c; 3 for 40c; 1/2 oz., 35c.

PRINCESS—WILT RESISTANT

Very attractive cutting type for florists. Plants 2'-2 1/2' tall, branching habit, bearing quantities of 3"-3 1/2" flowers on strong stems. Flowers have full crested center, surrounded by several rows of guard petals. Blooms in late August.

ASTER—PRINCESS LINDA

Anne. Peach Blossom.

Barbara. Orchid.

Bonnie. Soft salmon rose.

Golden Sheaf. Yellow self.

Linda. (new). Clear rose, an important new color for florists. Very wilt-resistant.

Marsha. Rich cinnabar scarlet, upright type.

Finest Mixed. Including many new colors.

Any of the above, Pkt., 25c, 3 pkts., 65c.

CANDYTUFT

GIANT HYACINTH-FLOWERED—Large, pure White flower. Oz., \$1.25; 1/4 oz., 40c; pkt., 10c; 3 for 25c. Mixed colors: 1/4 oz., 25c; pkt., 10c; 3 for 25c.

DIANTHUS—PINKS

SPECIAL MIXTURE of Double and Single Pinks. This magnificent mixture contains the cream of the annual pinks, both single and double. 1/4 oz., 50c; pkt., 10c; 3 for 25c.

SINGLE SWEET WIVELSFIELD—Mixed Colors. A cross of Dianthus Plumarius and Sweet William blooming the first year from seed. The flower heads resemble Sweet William in an almost unbelievable range of colors. 1/4 oz., 50c; pkt., 15c; 3 for 40c.

CHINESE DOUBLE MIXED.—Handsome clusters of very double flowers, many bright colors. Pkt., 10c; 3 for 25c.

HEDDEWIGI—Double Japan, best mixed. 1/4 oz., 25c; pkt., 10c; 3 for 25c.

LARKSPUR

GIANT IMPERIAL TYPE—In separate colors, deep Pink, Carmine Rose, Sky Blue, White, Rose Pink, Lavender, Lilac, also all colors mixed. Oz., \$1.60; 1/4 oz., 50c; pkt., 15c; 3 for 40c; 6 pkts., 60c.

TALL BRANCHING DOUBLE STOCK FLOWERED TYPE
Rose Pink, Rose, Salmon, Sky Blue, Dark Blue, Lilac, Rosy Scarlet, White, or all colors mixed. Oz., \$1.00; 1/4 oz., 35c; pkt., 10c; 6 pkts., 50c.

NASTURTIUM

DOUBLE VARIETIES

SEMI-DOUBLE GLEAM—Fire Gleam Scarlet, Orange Gleam, Salmon Gleam, Golden Gleam, Scarlet Gleam, Gleam Hybrids, all colors mixed. Oz., 35c; pkt., 10c.

SINGLE VARIETIES

Special Tall, mixed, Oz., 25c; 1/4 lb., 55c; pkt., 10c
Special Dwarf, mixed, Oz., 25c; 1/4 lb., 55c; pkt., 10c

MORNING GLORY

PEARLY GATES

The flowers are a lovely lustrous White with creamy shading deep down in the throat. They average four and one-half inches across. Pkt., 25c; 2 pkts., 45c.

CLARK'S IMPROVED HEAVENLY BLUE—The color is deep, intense blue, shading lighter toward the center. The flowers are large and freely produced. Oz., \$1.00; 1/4 oz., 30c; pkt., 15c.

SCARLET O'HARA

"Scarlet O'Hara" is an entirely new color in a Morning Glory, a rich Dark Wine Red, or Deep Rosy Crimson. Though the flowers are not as large as "Heavenly Blue," they are of good size, about 4 inches in diameter, and freely produced on fast growing vines which start blooming within 65 days after seed is sown. Pkts., 20c; 1/4 oz., 60c; oz., \$2.00.

CORNELL

This new variety Cornell combines the brilliant coloring of Scarlet O'Hara with the size of bloom and robust habit of the Heavenly Blue Morning Glories. The blooms are large, 4 to 4 1/2 inches in diameter, in an intense shade of Carnelian Red with a border a little over an eighth of an inch wide of pure glistening White, the colors of Cornell University. Pkt., 20c; 1/4 oz., 50c.

You can enjoy beautiful flowers of your own. Whether your garden be large or small the daily message of good cheer and beauty brought to you by your own flowers is one of the fine things of life.

If you need advice, feel free to ask us. We want you to enjoy the uplift that only flowers can give.

Harnden's — 64 Years Experience as Seedsmen.

Highest Quality Flower Seeds

MARIGOLDS

EXTRA DWARF DOUBLE, 6-8 INCHES

Butterball—Soft butter ball yellow. Pkt., 25c.
Spry—Yellow bordered mahogany. Pkt., 25c.
Sunkist—Bright golden orange. Pkt., 25c.
Extra Dwarf Double Finest Mixed. Pkt., 15c.

DWARF FRENCH VARIETIES

HARMONY (Double)—A remarkable break which differs from others in habit, shape, and coloring. Flowers, in form suggesting a Scabiosa, are a bright golden-yellow bordered with a rich maroon-red. The plants being about 12 inches high, and very bushy habit, form excellent material for bedding. $\frac{1}{4}$ oz., 60c; $\frac{1}{8}$ oz., 35c; pkt., 15c.

"HARMONY HYBRIDS"—The compact plants are 12 inches to 14 inches in height, 100% All-Double. All the flowers have the familiar crested center flanked by several rows of broad guard petals. Pkt., 15c; $\frac{1}{4}$ oz., 60c; $\frac{1}{8}$ oz., 35c.

CARNATION FLOWERED VARIETIES

GUINEA GOLD.—2 to 2½ ft. The original Carnation-flowered type, producing flowers 2 to 2½ inches across of brilliant orange flushed with gold. Practically 100% double. This is an early flowering sort. The absence of the characteristic marigold odor has been in its favor. $\frac{1}{8}$ oz., 35c; pkt., 10c.

YELLOW SUPREME.—A fitting companion to that great cut flower "Guinea Gold." Large, fluffy carnation-flowered blooms. Dazzling lemon-yellow color. Practically odorless foliage. $\frac{1}{4}$ oz., 50c; pkt., 10c.

CHRYSANTHEMUM FLOWERED

MAMMOTH MUM—The largest of the chrysanthemum flowered marigolds. The fluffy, ball-like, light sulphur-yellow blooms, made up of many finely cut individual florets intricately intertwined in true mum form, are 3½ in. and more across on long sturdy stems. The plants grow 30 in. tall. Pkt., 25c; 2 for 45c.

GOLDSMITH—Giant incurved chrysanthemum-like, golden orange flowers up to 3 in. across and almost a perfect ball in shape. Plants grow 18 in. tall; early and free blooming. Pkt., 25c; 2 pkts. for 45c.

LIMELIGHT—The lightest in color of all marigolds—a very soft primrose-yellow. Flowers grow 2¾ in. across, and are made up of hundreds of curled and interlaced petals to form a most exquisite pompon chrysanthemum-like head. Early, profuse blooming. 20 in. tall. Pkt., 15c; 2 for 25c.

YELLOWSTONE—Large, double, incurved chrysanthemum-like, clear golden yellow flowers, 2½ in. across, freely borne on 2 ft. vigorous plants. Lovely companion to Goldsmith. Pkt., 25c; 2 for 45c.

CHRYSANTHEMUM FLOWERED MIXED—Showy flowers of different chrysanthemum-like shapes, varying in size from 2½ to 3 in. in diameter and from the deepest red-orange to bright yellow. Long cutting stems. Grow 1½ to 3 ft. tall. Some bloom early, others midseason and a few late. A really "surprise" mixture that is sure to please. Pkt., 15c; 2 for 25c; $\frac{1}{8}$ oz., 60c.

Most anyone can grow flowers. If you have never had a flower garden of your own, why not start now? It's lots of fun. And when your plantings bloom you will understand the comfort and relaxation that only flowers can give.

Flower and Vegetable Seeds From
This List Prepaid Anywhere in the
United States.

PETUNIAS DWARF HYBRIDS

This dwarf compact class is the most popular for bedding. Make a vigorous growth and do well under the most trying conditions; also are grown in flats and pots. **BLUE BIRD**. (Blue Rosy Morn). $\frac{1}{8}$ oz., 50c; pkt., 15c; 3 for 40c.

CELESTIAL ROSE—Improved. This is a big improvement over that old favorite, Rose of Heaven. Beautiful, rich satiny, deep rose and unusually free blooming. Pkt., 25c; 2 for 45c; $\frac{1}{8}$ oz., \$2.00.

"GLOW"—The new American Beauty Petunia. A dwarf compact ball shaped variety of bright rose red with lighter throat, free flowering all season. Of rich coloring and a wonderful variety for garden and florists' use. Pkt., 25c; 2 for 45c.

ROSY MORN—Improved select stock, Rose color, is stronger and deeper; very dwarf strain. Pkt., 15c; $\frac{1}{8}$ oz., 50c.

ROSE OF HEAVEN—Select strain. Rose Pink. Pkt., 25c; $\frac{1}{8}$ oz., \$1.50.

SNOWBALL—Dwarf White. Pkt., 10c; 3 for 25c; $\frac{1}{8}$ oz., 75c.

HARDEN'S SPECIAL DWARF MIXTURE—Small flowering sorts. $\frac{1}{4}$ oz., \$1.25; $\frac{1}{8}$ oz., 75c; pkt., 25c; 2 for 45c.

ALDOUBLE ROSE MARIE—Delightful Rose-Pink. Per pkt. of about 100 seeds, \$1.00.

ALDOUBLE, COLOSSAL SHADES OF ROSE—Per pkt. of about 100 seeds, \$1.00.

AMERICA ALDOUBLE DWARF—Rose pink. Per pkt. of about 100 seeds, 50c.

DWARF GIANTS OF CALIFORNIA—A real dwarf strain especially good for pot plants as it starts to bloom when three or four inches tall. Giant flowers; colors largely dark rich shades. Pkt., 50c, about 250 seeds; about 500 seeds, 90c.

PETUNIA—DWARF CALIFORNIA GIANTS

IMPROVED DWARF ELK'S PRIDE—The type is real dwarf. The color is a richer velvety purple than usual and the plants produce larger blooms than found on any other Hybrid Grandiflora Variety. Pkt., 25c; 2 pkts., 45c.

PHLOX DRUMMONDI

PHLOX DRUMMOND GRANDIFLORA—Finest, mixed. $\frac{1}{8}$ oz., 55c; pkt., 15c; 3 for 40c; oz., \$3.75.

PHLOX DRUMMONDI GIGANTEA

Red Glory—Bright red with white eye. Pkt., 25c; $\frac{1}{8}$ oz., 75c.

Rosy Morn—Rose pink with eye. Pkt., 25c; $\frac{1}{8}$ oz., 75c.

Salmon Glory—Salmon pink with white eye. Pkt., 25c; $\frac{1}{8}$ oz., 75c.

Art Shades Mixed—Pkt., 25c; $\frac{1}{8}$ oz., 75c.

ZINNIAS

ZINNIA FANTASY

Fantasy is the most fascinating new Zinnia type introduced to the flower world in many years. The very informal, shaggy appearing flowers are graceful and interesting, quite distinct from the stiff, formal zinnias of which we are accustomed. In separate named varieties. Bright Rose, Orange, White, Golden Yellow, Rich Scarlet, and all colors mixed. Oz., \$2.00; $\frac{1}{4}$ oz., 60c; pkt., 15c; 2 for 25c.

ZINNIA FANTASY

DAHLIA FLOWERED CLASS

BODGER'S FAMOUS GOLD MEDAL ZINNIAS

The plants grow tall, are well branched and the colors are very distinct and striking; the flowers are double and large, measuring from 5 to 6 inches across. In many separate colors, Yellow, Red, Lavender, Orange, Gold, Deep Rose, Orange and Gold, Scarlet, White, Purple, Lemon Royal Purple, all named varieties. Oz., \$1.50; $\frac{1}{4}$ oz., 50c; pkt., 15c.

GOLD MEDAL HYBRIDS—A superior mixture containing many new varieties from the trial grounds of the originator and the better named varieties. Oz., \$1.50; $\frac{1}{4}$ oz., 50c; pkt., 15c.

CALIFORNIA GIANT CLASS

They are larger than Colossal and a cross between them and the Dahlia Flowered types. They have smaller flat centers with more loosely placed petals. The petals are decidedly imbricated and the flower from bud to full bloom presents a graceful appearance. In many separate colors all named varieties. Canary Yellow, Orange, White, Cerise Rose, Pink, Rose Scarlet, Dark Red, Lavender, Salmon, Rose, Purple, also all colors mixed. Oz., \$1.50; $\frac{1}{4}$ oz., 50c; pkt., 15c.

LILLIPUT CLASS

POMPOM OR BABY ZINNIAS

The Lilliputs are among the most popular Zinnias for cut flower use. The flowers are small, compact, and symmetrical, and strong stemmed. Scarlet, White, Golden Yellow, Crimson, Salmon Rose, Rose Pink, Lilac Purple, Black Ruby, Burnt Orange and all colors mixed. Oz., \$1.50; $\frac{1}{4}$ oz., 50c; pkt., 15c.

SWEET PEAS

Spring Flowering (CUTHBERTSON)

This is the new type, named in honor of Frank G. Cuthbertson, who was primarily responsible for the development of this important addition to the Sweet Pea Family. Chief characteristics are—great vigor, profusion of large fragrant blossoms, extra long stems, clear popular colors, ability to produce out of doors in those sections where heretofore Sweet Peas have been unsuccessful due to hot weather conditions.

Billy, Light Carmine. Evelyn, Salmon Pink.
Coline, Scarlet. Frank G., Rosy Lavender.
David, Bright Rose Crimson. Janet, White.

Tommy, Clear Medium Blue.
Each of the above, Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 65c.
Mixed—All of the above, Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 65c.

ASPARAGUS

1 oz. to 100-foot row. 4 lbs. to acre.

MARY WASHINGTON—A recently developed rust-resistant strain, producing large deep green sprouts of splendid quality. Pkt., 10c; oz., 25c; ¼ lb., 75c.

ROOT PLANTING. A year may be saved by buying the plants and setting them at least two feet apart in the row, and the rows not closer than four feet; see that the roots are well and evenly spread out in planting.

ASPARAGUS ROOTS—2-year-old roots. Doz., 65c; 25 for \$1.25; 100, \$3.50. Do not cut the first year.—Prepaid.

GARDEN BEANS

1 lb. to 100-ft. row. 60 lbs. to acre.

CULTURE. There is hardly a vegetable that contributes to the table as liberally as the snap bean. It is easy to grow and a heavy producer. Beans should be planted at intervals so that one may always have a fresh patch to depend upon.

For the best crops beans require good rich soil and frequent hoeing. The young plants are very tender and cannot withstand even slight frosts. The seed should not be planted until the soil has become well warmed and all danger of frost is over. Spade or plow deeply and plant in rows 2 feet apart, scattering the seed about 3 inches apart in the row, and cover 2 inches deep. Hoe frequently, but never when the foliage is damp from dew or rain. Hoeing should be done shallow so that the roots are not injured.

BRUSSELS SPROUTS

¼ oz. to 100-ft. row. 2 oz. to acre.

Brussels Sprouts are miniature cabbage formed on a plant stalk. The delicate flavor is improved by a touch of frost. The culture is practically the same as for cabbage. For late use sow seed in June.

LONG ISLAND—Hardy and heavy yielder. A fine variety originated and grown in Denmark. Pkt., 15c; oz., 90c; ¼ lb., \$2.50.

TABLE BEETS

1 oz. to 100 feet. 5 lbs. to acre.

Early Wonder Beet

CULTURE. Beets thrive best in deep, rich, sandy soil, one which the roots can penetrate easily. For extra early use the seed may be sown in hotbeds and the young plants set out in the open, trimming off the outer leaves. They can be transplanted easily in moist weather. For early use, spade or plow deeply, sow seed in rows 18 inches apart, covering one-half inch deep. If dry, the soil should be well firmed about the seed. When three or four leaves have developed, thin out to four inches apart in the row, allowing the strongest to remain. Keep free from weeds. For main crop sow end of April. For Winter crop, sow end of June.

BROCCOLI

¼ oz. to 100 ft. row. 2 oz. to acre.

ITALIAN GREEN SPROUTING—Rapidly becoming a very popular vegetable. Culture is the same as Cauliflower but much easier grown. A rapid grower, producing bluish green heads in center of plant about 90 days after planting. After original head is cut, the plant produces many branches which also bear smaller heads. It is usually served like Cauliflower but the flavor is distinct and has no similarity to Cauliflower. It is also cooked and served the same way as Asparagus. 90 days. Pkt., 15c; oz., 75c; ¼ lb., \$2.25.

CABBAGE

Copenhagen Market Cabbage

¼ oz. to 100-ft. row. 2 oz. to acre.

CULTURE. Start with good seed. For extra early use, seed may be sown in January or February very thinly in hotbeds—for medium early, start seeds last of February or early March in hotbeds, but glass is not required. Muslin covers are satisfactory. For late crop, start the seed in cold frames in late April or early May and not over one-fourth inch deep. Plants should be set in rows 2½ to 3 feet apart and 12 to 18 inches in row.

CARROT

½ oz. to 100-ft. row. 2½ lbs. to acre.

CULTURE. The Carrot will do well in any good, well worked soil. For early use sow the seed when the ground is fit to work, in rows 15 inches apart, and when 2 inches high, thin out so that the plants stand 2 inches apart in the row. For fall and winter use, sow the seed from the 1st to the 15th of June. The roots may be stored in cellar or pit covered with dirt, where they will keep solid until late in the Spring.

ED VEGETABLE SEEDS

64th Year

CANTALOUPE

1 oz. to 100 hills. 2 lbs. to acre.

CULTURE. Prepare hills, 4 to 6 feet apart, in a rich, moderately dry sandy soil, using well-rotted manure. When frost is over, plant 10 to 12 seeds in each hill about one inch deep, and when well up, thin out, leaving four strong plants to the hill. Pinch off the ends of the vines when about a foot long; this will make them strong and bear more freely. Give frequent but shallow cultivation till the vines cover the ground. Do not grow near cucumbers, squashes, etc.

CAULIFLOWER

¼ oz. to 100-ft. row. 1 oz. to 3,000 plants. 4 oz. to acre.

CULTURE. Grows well in cool weather, and in general should be grown like cabbage. For early crop, sow in hotbed in January or February, and transplant when danger of freezing is past. For late crop, sow in May or June and grow like late cabbage. Set the plants about 18 inches apart in rows 2 to 2½ feet apart. An ounce of seed will produce about 3000 plants; ¼ lb. is enough for an acre.

	Pkt.	½ Oz.	¼ Oz.
Super Snowball25	.75	1.25

CELERY

¼ oz. to 100-ft. row. 1 oz. to 15,000 plants. 4 oz. to acre.

CULTURE. Sow in drills early in spring as soon as the ground can be worked. The soil should be rich and well prepared. Cover the seed lightly with fine earth, tamping in firmly. Keep moist to insure germination and quick, vigorous growth. In order to secure stocky plants cut off the tops once or twice before transplanting to the field or garden. Set plants 6 to 8 inches apart in rows from 3 to 4 feet apart. Transplanting should be done about the last of June. Care should be taken to firm the earth well around the roots of the plant; work up the soil between the rows, drawing it to the plants from time to time until they are covered to the very tops.

	Pkt.	½ Oz.	Oz.
Giant Pascal15	.65	1.25

COLLARDS

¼ oz. to 100-ft. row.

A tall, loose leaved cabbage-like or kale-like plant grown throughout the South. It is extensively used for the table and for stock in the South where it continues in growth and is usable throughout the entire winter. Collards usually succeed in locations where cabbage cannot be grown to perfection.

	Pkt.	Oz.	¼ Lb.
True Georgia10	.20	.60

CRESS

¼ oz. to 100-ft. row.

CURLED, or PEPPER GRASS.—This small salad is much used with lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. Sow thickly in drills 16 inches apart. 40 days. Pkt., 10c; oz., 50c.

CUCUMBER

1 oz. to 100 hills. 2 lbs. to acre.

CULTURE. Plant when the weather becomes settled warm, about the end of April or during May, not over an inch deep, in hills four feet apart each way. The hills should be previously prepared by mixing well-rotted manure with the soil. Put ten seeds in each hill, thin out to four plants, and give frequent but shallow cultivation. For pickling, plant in June or July.

EGGPLANT

An ounce produces about 1,000 plants.

CULTURE. Plant in hotbed in February or March and keep well protected so that the growth be rapid and not checked. When 2 inches high, transplant to pots, boxes or in the beds 3 to 4 inches apart, and when frost is past, set out 3 feet apart in a deep, rich loamy soil. Seeds germinate slowly.

	Pkt.	Oz.	¼ Lb.
Black Beauty15	.85	2.50

ENDIVE

Beginning in March, plant each month till September in 18-inch drills and thin out to one foot apart. When nearly grown, tie up the outer leaves to blanch the heart, but do it when the plants are dry. In dry seasons give plenty of water.

	Pkt.	Oz.	¼ Lb.
Green Curled10	.25	.75
Broad Leaf Batavian10	.25	.75

KALE

Sow seed in the open from early spring until the middle of August. The early sowings give fully grown plants, whereas the later sowings will furnish delicious, small, tender leaves. Frost improves the flavor. Thin to 12 in. apart in rows 2 to 3 ft. apart. One pkt. will sow 30 ft. of row; 1 oz. 200 ft.

DWARF GREEN CURLED.—55 days. Low-growing compact plants with deeply curled, dark green leaves used for "greens." Pkt., 10c; oz., 25c; ¼ lb., 75c.

KOHL RABI

The edible part is the turnip-shaped bulb that grows above ground. Combines the flavors of the cabbage and turnip and makes a splendid dish if used when 2 to 3 inches thick. Plant in drills as early as the ground can be worked, thinning out to stand 5 to 6 inches in the row. For a succession, plant every two weeks till end of April. For fall use, plant in August or early September. Kohl rabi should be more generally grown.

	Pkt.	Oz.	¼ Lb.
Early White Vienna15	.75	2.00

LEEK

Plant February, March and September.

CULTURE. Superior to onions for soup flavoring, etc. Plant early in the spring in a light, rich, moist soil in drills half an inch deep. When 6 or 8 inches high, trim off the tops and roots and transplant 4 to 6 inches apart in one-foot rows setting the plants in the ground up to their center leaves, and earth up to blanch the necks. One ounce will plant about 100 feet of drill.

	Pkt.	Oz.
American Broad-Leaf15	.75

LETTUCE

¼ oz. to 100-ft. row; 3 lbs. to acre

CULTURE. For general crop, sow as early in the spring as the ground can be worked in drills 18 inches apart, and thin the young plants to 4 inches apart in the row. As the plants begin to crowd, thin them out and use as required. Keep the soil constantly loose by frequently hoeing. Lettuce to be at its best should be grown as rapidly as possible, hence the soil should be made as rich as possible by liberal manuring and thorough preparation. For winter, sow under glass from November to February and thin out as necessary to prevent crowding. Keep a moderate heat and give all the light and air possible.

MUSTARD

½ oz. to 100-ft. row. 5 lbs. to acre.

The greens, for which this quick growing plant is chiefly raised, are fully as healthful and nourishing as spinach. Mustard is related to turnip, and although the tops are much alike in richness and flavor, mustard leaves are more tender and the stems not so long and coarse.

Seed may be sown from early spring to midsummer in rows 18 inches apart. Thin to 5 or 6 inches apart in the rows. The plants are in condition for use as soon as the leaves are the size of one's hand. Mustard runs to seed quickly, so that successive plantings are necessary for a continuous supply.

SEED CO.

ulbs, Flower and Vegetable Plants

3, Victor 1618 Kansas City 6, Mo.

SPRAYERS · FERTILIZERS · SPRAYING MATERIALS

ONIONS

1/3 oz. to 100-ft. row. 4 to 5 lbs. to acre.

THE SOIL. Soft, dark, sandy loam, not too fine. This is much better if it has been cultivated with hoed crops, kept clean from weeds and well manured for two years previous, because if a sufficient quantity of manure to raise an ordinary soil to a proper degree of fertility is applied at once, it is likely to make the onions soft.

SOWING THE SEED. This should be done as soon as the ground can be made ready and can be done best by a hand seed drill. This should be carefully adjusted to sow the desired quantity of seed about one-half inch deep. The quantity depends on the soil and kind of onions desired. Four to five pounds is the quantity used for an acre to grow large onions.

PARSLEY

1/2 oz. to 100-ft. row. 3 lbs. to acre.

CULTURE. The seed is very slow to germinate and should be sown very early in the spring, previously soaking the seed for a few hours in warm water. Sow in drills 1 foot apart, and when the plants are well up thin to 1 foot in the row. When the plants are about 3 inches high cut off all the leaves; the plant will be brighter and better curled; every cutting will result in improvement. One ounce to 150 feet of drill.

	Pkt.	Oz.	1/4 Lb.
Champion Moss Curled.....	\$.10	\$.30	\$.85

PARSNIPS

1/4 oz. to 100-ft. row. 3 lbs. to acre.

CULTURE. Plant as early in the spring as the weather will permit till the middle of June. Plant 1/2 inch deep in a rich, deeply worked, sandy loam, in rows 18 inches apart, cover lightly, and when 2 inches high thin out to 4 to 5 inches apart. Parsnips germinate slowly, especially in dry weather; plant a few radish seeds with them to mark the row for early cultivation. Parsnips are improved by frost, so they can be dug as wanted, or stored for winter use.

	Pkt.	Oz.	1/4 Lb.
Improved Hollow Crown.....	\$.10	\$.30	\$.90

PEPPERS

1/4 oz. to 100-ft. row. 1 oz. to 1500 plants. 2 lbs. to acre.

CULTURE. Peppers should be started in a hotbed or cold frame and transplanted about the end of May into a sunny corner of the garden, in rows about 2 feet apart, with the plants about the same distance between them in the rows. In warmer sections they can also be sown in open ground in a prepared seedbed when all danger from frost has passed, the weather has become settled and the soil warm. When the little plants are about 3 inches in height, transplant as above into the rows where they are to remain. Some very rich fertilizer stirred into the soil when the plants are about 6 inches high, will be found very beneficial to the crop. The peppers intended for mangoes should not be grown near the hot varieties, or they will partake of their fiery nature.

TOBACCO

1 oz. to 5,000 plants.

CULTURE. Sow seed for plants early in spring in frames or seed bed, using soil well enriched with wood ashes, etc. Transplant to open ground when weather has become warm and settled, in rows 4 feet apart, and give cultivation as for corn.

WHITE BURLEY—This variety is especially valuable to manufacturers, either for cut or plug tobacco. It is sometimes used for wrappers. Pkt., 10c; oz., 85c.

GARDEN PEAS

1 lb. to 100-ft. row. 60 lbs. to acre.

CULTURE. For early peas the soil should be light and warm, but for general crop a moderately heavy soil is better. Fresh manure and very rich or mucky soil should be avoided as they cause a rank growth of vine at the cost of the quality of the peas. Sow as early as possible a few of some early variety on warm, quick soil, prepared the fall before, planting in double rows 6 to 8 inches apart and 2 1/2 to 4 feet between the double rows. Larger pods and more of them will be produced if the seed be planted in trenches 3 to 6 inches deep and covered with only 1 or 2 inches of soil; when the plants are 5 to 6 inches high fill the trench level with the surface. If the peas be covered to the full depth at first, or if water be allowed to stand in the trenches, they will not germinate or grow well. All varieties growing more than 1 1/2 feet do better if staked up or brushed when 4 to 6 inches high. The support is usually given by sharpened branches of trees set between the double rows.

PUMPKINS

3/4 oz. to 100 hills. 3 to 4 lbs. to acre.

CULTURE. Pumpkins are not so particular in regard to soil as melons or cucumbers, but are cultivated the same, though on a larger scale. They are raised between hills of corn or in fields by themselves. After danger of frost is over plant the seed in hills 8 to 10 feet apart each way, dropping about a dozen seeds in each hill. Have the soil as rich as possible.

RADISHES

2-3 oz. to 100-ft. row. 12 lbs. to acre.

CULTURE. To be tender and crisp, radishes must be grown quickly—and quick growth requires rich soil and plenty of moisture. Commencing with the first mild spell of weather in the Spring, sow at intervals of 10 days in a light rich soil that has been deeply dug. They can also be grown as a catch crop between the rows of beets,

lettuce, onions, etc. Radishes can be forced in the hotbeds, but they must have plenty of ventilation and moisture.

RHUBARB or Pie Plant

CULTURE. Plant in March or April in a shaded place, and when a few inches high thin to 12 inches apart, and in the fall or following spring transplant 4 feet apart. The best stalks are produced the second year, but it continues to produce for several years. Apply plenty of manure. Our rhubarb makes fleshy stalks of the best quality and flavor.

VICTORIA GIANT—This is a very large and late variety, with round stalks of great length and thickness; produces a succession of stalks the whole season; held in high esteem by market gardeners. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

RHUBARB ROOTS—Large roots, each 15c; two for 25c; per dozen, \$1.25; per 100, \$8.00. Add 5c each for postage if to go by mail.

RUTABAGAS

CULTURE. Sow the seeds a month earlier than turnips. Rutabagas should be sown on ground enriched with well rotted manure, in drills 2 1/2 feet apart, and should be thinned to 6 to 8 inches apart in the row.

PURPLE TOP YELLOW—Leading yellow variety; very productive, solid and excellent flavor; the roots grow to a large size, and are of the finest quality; unsurpassed for stock feeding. 90 days. Pkt., 10c; oz., 25c; 1/4 lb., 50c.

SALSIFY

(OYSTER PLANT)

3/4 oz. to 100-ft. row. 8 lbs. to acre.

One of the most desirable winter vegetables. The roots when cooked are very palatable and are served in a variety of different ways.

CULTURE. It succeeds best in a light, well enriched soil; coarse and fresh manure should be avoided, as it will surely cause the roots to grow uneven and ill-shaped. Sow the seed as early as possible, and quite deep in drills about 18 inches apart and thin the plants to 3 inches in the row.

MAMMOTH SANDWICH ISLAND—This variety grows to an extra large size, averaging fully double the size and weight of roots of the old French variety. 95 days. Pkt., 15c; oz., 50c; 1/4 lb., \$1.75.

TURNIP

CULTURE. First early varieties of turnips should be planted just as early in the spring as the ground is dry and warm. You may sow them in drills, beds or late broadcast, or among corn. The Winter Rutabaga varieties and also the early sorts will do better if planted in drills. Make the drills at least 18 inches apart, and then thin out the plants when well up to from 6 inches apart down to 3 inches, according to the variety.

GARDEN TOOLS · EVERYTHING FOR THE GARDEN

SWEET CORN

½ lb. to 100 hills row. 12 lbs. to acre.

Warm weather, rich soil and moderate moisture are best for corn, but a satisfactory crop can be grown in any garden if the soil is deeply and thoroughly worked before planting. Sweet corn seed is likely to rot if planted in cold weather, so planting should be governed by this fact. Seeds may be planted either in rows or hills. If planted in rows, they should be spaced from 2½ to 4 feet apart, depending on the height of the variety; seeds should be dropped at the rate of 5 or 6 to the foot, and covered about 2 inches deep. If planting in hills, drop 5 or 6 seeds per hill and space the hills 3 feet apart each way. When plants are 4 or 5 inches tall, thin to 8 to 12 inches apart and keep well hoed until the ears are set.

SPINACH

CULTURE. For early summer use, plant early in spring in a good, well-fertilized soil, in drills 1 inch deep, 1½ to 2 ft. between the rows. Requires but little cultivation. Two ounces will plant 100 feet of drill; 12 to 15 pounds one acre. The above applies to all varieties except New Zealand, which should not be planted until the ground is thoroughly warm and will yield an abundant supply of delightful succulent greens right up to cold weather.

New Zealand10	.20	.60	1.25

SQUASH

CULTURE. Summer or bush varieties should be planted in rows 3 feet apart and 3½ feet in the row, for these sorts are produced on bushes and never trail.

Winter varieties are of different growth and should be planted in hills about 4 to 5 feet apart and allowed to vine and trail all over the ground. Squash do not demand much cultivation and thrive on almost any soil. Never plant squash until all danger of frost is past, for they are very sensitive to cold. Drop 3 to 4 seeds to the hill. Always be careful not to bruise when harvesting, for a bruise will start decay and the squash will spoil.

TOMATOES

1 oz. to 2,500 plants. 2 ozs. to acre.

Break-O-Day

CULTURE. Tomatoes do best on not over rich soil, and success depends upon securing a rapid, vigorous and unchecked growth during the early part of the season. Even a slight check while the plants are small will materially diminish their productiveness. Sow the seed in hotbeds or seed boxes, and when the plants have four leaves, transplant into shallow boxes or cold frames.

DWARF OR TREE VARIETIES

	Pkt.	Oz.
Improved Dwarf Stone.....	\$.10	\$.75

NEW GIANT TREE

If you haven't grown Giant Tree Tomato yet, why wait? The huge, smooth, pink fruits have few seed, a mild non-acid flavor, and meaty flesh; they are borne on potato-leaved plants of amazing vigor. You will eventually grow this variety. Why not be ahead of your neighbors? Pkt., 50c.

SWISS CHARD

1 oz. to 100-ft. row. 5 lbs. to acre.

Member of the beet family, is grown for the leaves only, and cooked like spinach. The midrib is prepared like asparagus. It is hardy and productive, with broad green leaves and large white midribs or chards of excellent quality, and can be sown at different seasons of the year, giving successive greens.

Fordhook Giant10	.20	.60
Rhubarb-Chard15	.45	1.35

WATERMELONS

4 oz. to 100 hills; 4 lbs. to acre.

CULTURE. To grow good Watermelons it is essential to have good rich soil, an abundance of well-rotted manure, hen manure, guano, or other forms rich in nitrogen being most desirable. Put a good covering of fresh soil over the manure. Plant in hills about 6 feet apart; plant from 10 to 12 seeds in a hill.

Frequent watering of the plants with liquid manure will hasten the growth, thus diminishing the danger from insect pests. The protection against blight and insect pests is to maintain a vigorous and continuous growth.

HERBS

Aromatic, Medicinal, and Kitchen

Herbs belong in every vegetable garden.

ANISE—75 days. Annual 1½ to 2 ft. Used for garnishing and are used in cakes, bread, soups, cream or cottage cheese and other foods. Pkt., 15c; oz., \$1.00.

BASIL, SWEET—85 days. Annual. 1½ to 2 ft. The leaves, green or dried, are chiefly used as a seasoning for soups, stews, sauces, salad and meats. Pkt., 15c; oz., \$1.00.

CARAWAY—70 days. Biennial. 1½ to 2 ft. Seeds are used for flavoring bread, pastry, cakes, confections, cheese, sauces, etc.; young leaves and shoots may be used to flavor salads. Pkt., 15c; oz., 75c.

CATNIP or CATMINT—80 days. Perennial. 1½ to 2 ft. The green or dry leaves are used for seasoning and as tea for nervous headaches. Excellent tonic for animals. Pkt., 15c; oz., \$1.00.

CHIVES—80 days. Perennial, 6 in. Tops, finely cut, are used for giving a mild onion-like flavor to soups, stews, meats, potatoes and are also used in salads. Pkt., 15c; oz., \$1.50.

CORIANDER—75 days. Annual. 1 to 2 ft. The green leaves are used in soups, stews, and sauces; the dried seeds in meats, sausage, sauces, pickles, poultry filling, confectionery and pastry. Pkt., 10c; oz., 75c.

DILL—70 days. Annual. 2 to 2½ ft. The green leaves are nice for flavoring soups, stews and sauces; the dry or green branches and seeds are much prized for flavoring dill pickles. Pkt., 10c; oz., 25c; ¼ lb., 75c.

SWEET FENNEL—60 days. Annual. 2½ ft. The enlarged, flat-oval leaf base has a pleasing anise-like flavor. Seeds are used in Italian sausage. Pkt., 15c; oz., 80c.

LAVENDER, TRUE—60 days. Perennial. 2 ft. tall. Flowers are dried and placed in the linen closet to impart their perfume to the linens. Sweet scented, light lavender-blue flowers. Pkt., 15c; oz., \$3.00.

SAGE—75 days. Perennial. 1 to 2 ft. Used as a seasoning for poultry, sausage, other meats, dressings, fillings, stews, soups and sauces. Pkt., 15c; oz., \$1.40.

SUMMER SAVORY—60 days. Annual. 1 ft. Used chiefly for flavoring salads, dressings, stews, and gravies. Pkt., 15c; oz., 90c.

SWEET MAJORAM—70 days. Annual. 1 to 2 ft. Used for seasoning either fresh or dried in soups, stews, meat pies, salads and in making sausages. Pkt., 15c; oz., \$1.90.

THYME—85 days. Perennial. 6 to 12 inches high. Has aromatic foliage which is used for seasoning soups, stews, gravies, sauces and dressing in much the same way as mint. Pkt., 15c; oz., \$1.90.

Seed and Fertilize Your Lawn · Harnden's Grass Seeds

PRICES ON GRASS SEEDS

The quality of Blue Grass Seed is determined by the weight per measured bushel; the heavier the seed the better the germination and purity. With the aid of new, modern cleaning machinery, seed that will weigh 21 lbs. Standard Heavy Seed, 24 lbs. Extra Heavy Seed, and 28 lbs. Super fine seed, to the measured bushel can now be had. Seed that weighs less than 21 lbs. to the bushel is not fit for lawn sowing, on account of the low germination and weed seed contained.

PLEASE NOTE: The chaff and light seed and weeds that is cleaned out of Blue Grass is sold to some dealers, who advertise it as "BLUE GRASS" at ridiculously low prices. Do not be attracted by these offers, as there is no seeding value whatever in this off fall from good seed.

QUANTITY OF SEED TO USE

ON NEW OR RECONDITIONED LAWNS: Use one pound to each two hundred square feet and sixty to one hundred pounds to the acre.

RESEEDING OLD LAWNS: One pound to each three or four hundred square feet and thirty or fifty pounds to the acre.

ASK FOR PRICES IN LARGER LOTS EROSIONET for Stubborn Terraces

EROSIONET is a strong, economical, open-mesh fabric made of tightly twisted, paper twine. When placed over any seeded surface, its 1/4-inch square mesh forms millions of tiny dams which catch and hold your seed and sod firmly in place. Thus, damaging "washouts" from heavy rains are effectively checked without cutting off the sunlight.

Erosionet also catches and holds moisture. It helps overcome seed losses and lawn disappointments from poor germination. Erosionet never presents an unsightly appearance, clover and grasses soon rendering it invisible. Erosionet is rot-resisting and can easily be removed when grass becomes 2 1/2 in. high. Comes in rolls 45 in. wide and can be purchased in any lengths. Yard, 23c.

HORMONE TREATED—Any grass seed can be Hormone Treated at an additional cost of 10c per lb.

Simply mix Rootone at the rate of 1/2 oz. to 5 lbs. of seed. Rootone, 1/4 oz. pkg., 25c; 2 oz. jar, \$1.00.

KINDS OF GRASS TO SOW KENTUCKY BLUE GRASS

On Well Established Lawns

For sowing in the open places, use high grade, heavy blue grass, with a portion of White Clover, if wanted. Use about three-fourths Blue Grass and one-fourth Clover.

STANDARD HEAVY SEED which will weigh about 21 lbs. to the measured bushel. Lb., 85c; 10 lbs., \$8.00; 25 lbs., \$19.50; 50 lbs., 76c lb.; 112-lb. bag, 75c lb.

EXTRA HEAVY SEED which will weigh about 24 lbs. to the measured bushel. Lb., 95c; 10 lbs., \$9.00; 25 lbs., \$22.00; 50 lbs., 86c lb.; 112-lb. bag, 85c lb.

SUPER FINE SEED which will weigh about 28 lbs. to the measured bushel. Lb., \$1.00; 10 lbs., \$9.50; 25 lbs., \$23.25; 50 lbs., 91c; 112-lb. bag, 90c lb.

HARNDEN'S EVERGREEN LAWN SEED

For Making New Lawns in the Open Places

Lb., 80c; 10 lbs., \$7.50; 25 lbs., \$18.50;
50 lbs., 73c lb.; 100-lb. bag, 70c lb.

HARNDEN'S SHADY LAWN GRASS

For Shady Places and Under Trees

Lb., 90c; 10 lbs., \$8.50; 25 lbs., \$21.00;
50 lbs., 83c lb.; 100-lb. bag, 80c lb.

HARNDEN'S TERRACE LAWN GRASS

For Terraces and Steep Inclines

Lb., 90c; 10 lbs., \$8.50; 25 lbs., \$21.00;
50 lbs., 83c lb.; 100-lb. bag, 80c lb.

POA-TRIVIALIS Shade Grass—Per lb., \$1.50; 10 lbs., \$1.40 lb.; 25 lbs., \$1.38 lb.

RED TOP

This is a very fine quick growing grass, which is also used in mixtures to thicken up the turf, looks very much like blue grass. Lb., 95c; 5 lbs., \$4.60; 10 lbs., \$9.00; 25 lbs., \$22.25.

SEASIDE BENT GRASS

This is the true, unmixed creeping Bent Grass Seed, certified Oregon grown, of high germination and free from weed seeds. Lb., \$1.40; 5 lbs., \$6.75; 25 lbs., \$31.25.

CHEWINGS FESCUE

Chewings Fescue is a fine bladed perennial grass with a spreading deep root system which is very valuable on steep banks; also does well in sandy soils. Lb. 90c; 5 lbs., \$4.35; 25 lbs., \$20.00.

RYE GRASS

This grass germinates and grows very quickly. Is often used in mixtures as a nurse crop for blue grass and other slow growing grasses. Usually dies out about the second year. Used in the south for winter lawn grass. Lb. 35c; 10 lbs., \$3.00; 25 lbs., \$6.25.

WHITE DUTCH CLOVER Or Lawn Clover

A small, close growing, useful clover of unusual dwarf habit, used extensively in the making of lawns. Lb., \$1.50; 5 lbs., \$7.25; 10 lbs., \$1.40 lb.
